this book discusses automated computing systems which are mostly powered by intelligent technologies like artificial intelligence machine learning image recognition speech processing cloud computing etc to perform complex automated tasks which are not possible by traditional computing systems the chapters are extended version of research works presented at second phd research symposium in various advanced technologies used in the field of computer science this book provides an opportunity for the researchers to get ideas regarding the ongoing works that help them in formulating problems of their interest the academicians can also be benefited to know about the current research trends that smooth the way to guide their students to carry out research work in the proper direction the industry people will be also facilitated to know about the current advances in research work and materialize the research work into industrial applications

combinatorics the mathematical study of counting and combinations plays a foundational role across various scientific and technological disciplines to understand complex networks and algorithms combinatorics helps with cryptography and statistical physics as the field evolves using advanced applications and computer base simulations become integral using combinatorial structures and hypothesis by blending abstract theory with practical computation modern combinatorics continues to drive innovation and discovery across mathematics and beyond concepts applications and simulations in combinatorics offers a comprehensive yet accessible exploration of combinatorics emphasizing its relevance across different educational levels it examines the philosophical and practical significance of discrete mathematics highlighting how combinatorics supports critical thinking and problem solving in diverse fields covering topics such as combinatorial calculus graph counting and probability this book is an excellent resource for mathematicians researchers academicians educators and more

the new edition of this popular book has been transformed into a hands on textbook focusing on the principles of wireless sensor networks wsns their applications their protocols and standards and their analysis and test tools a meticulous care has been accorded to the definitions and terminology to make wsns felt and seen the adopted technologies as well as their manufacturers are presented in detail in introductory computer networking books chapters sequencing follows the bottom up or top down architecture of the seven layers protocol this book starts some steps later with chapters ordered based on a topic s significance to the elaboration of wireless sensor networks wsns concepts and issues with such a depth this book is intended for a wide audience it is meant to be a helper and motivator for both the senior undergraduates postgraduates researchers and practitioners concepts and wsns related applications are laid out research and practical issues are backed by appropriate literature and new trends are put under focus for senior undergraduate students it familiarizes readers with conceptual foundations applications and practical project implementations for graduate students and researchers transport layer protocols and cross layering protocols are presented and testbeds and simulators provide a must follow emphasis on the analysis methods and tools for wsns for practitioners besides applications and

deployment the manufacturers and components of wsns at several platforms and testbeds are fully explored

this book includes high quality research papers presented at the second international conference on innovative computing and communication icicc 2019 which is held at the vřb technical university of ostrava czech republic on 21 22 march 2019 introducing the innovative works of scientists professors research scholars students and industrial experts in the fields of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications
